

Kristin Manteufel – Director of Sales – Converting

As Director of Sales for two companies, Kristin Manteufel is responsible for the sales for the Converting divisions of Resource One International & Waldan Paper Services. In the manufacturing industry of paper, beside the mills themselves, there is the need of a converter to make products into useable finished goods or components. “Converting” is a very broad term, used to describe many processes used to make a finished paper product. This can include cutting, slitting, sheeting, printing, coating, embossing and packaging.

Kristin joined the industry after graduating from college and started in her family’s business of slitting and rewinding in Neenah, WI. Waldan Paper Services then purchased this business in 1989 where she learned the art of Flexographic printing, Gravure coating and further processes of Converting. As Waldan grew, Kristin had increasing responsibility roles in the company until reaching an executive managing member of the company. With the successful growth of the company, Waldan Paper Services was sold to Resource One in 2018, and she was promoted to Director of Sales for both companies to manage the converting sales for both locations.

Kristin’s commitment and passion in the paper industry has been inspiring for her and has helped develop new products and business growth. “One of the most enjoyable parts of my job is working with people and to find solutions for customers and produce the products for them.” With her technical background and understanding of these manufacturing processes, it has help develop successful business segments.

In her free time, she enjoys spending time with family, friends and her golden retriever, Bella. Also is an avid sports fan & master gardener. She volunteers with various organizations in the Fox Valley.
